EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/24/10 has been entered.

Allowable Subject Matter

2. Claims 1-6, 26-29 (to be re-numbered as 1-10) are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the most relevant prior art of record, Ko reference, teaches obtaining an image of a defect on a sample using one of an electron type image detector and an optical image detector; extracting a characteristic of the defect from the image using a characteristic extractor; and classifying the defect in accordance with the extracted characteristic, and based on a rule-based classification and a learning type classification (see Final Rejection on 2/25/10).

Applicant's claimed invention distinguishes over the Ko reference by wherein the step of classifying further comprises: calculating a set of first likelihoods of the defect belonging to each

of a plurality of defect classes of the rule-based classification, by use of the extracted characteristic using a likelihood function which applies a plurality of if-then rules to calculate an index corresponding to a degree of probability that the defect belongs to a particular defect class; calculating a set of second likelihoods of the defect belonging to each of a plurality of defect classes of the learning type classification, by use of the extracted characteristic, wherein the learning type classification determines a distance to a center of a normal distribution of data for each defect class; calculating a third set of likelihoods of the defect belonging to each of the defect classes of the learning type classification and/or the defect classes of the rule-based classification, by use of the first and second likelihoods; and classifying the defect by use of the third likelihoods; and wherein the rule-based classification and learning type classification are present in a parallel relationship with each other and independent of each other.

Regarding claim 26, the most relevant prior art of record, Ko reference, teaches an imager which obtains an image of a defect on a sample; a characteristic extractor which extracts a characteristic of the defect from the image; a classifier which classifies the defect in accordance with the extracted characteristic, and based on a rule-based classification and a learning type classification, and a display for displaying the image of the defect and the classification result on a screen (see Final Rejection on 2/25/10).

Applicant's claimed invention distinguishes over the Ko reference by wherein said classifying means comprises: a rule-based classifier which calculates a set of first likelihoods of the defect belonging to each of a plurality of rule classes by use of the characteristics of the defect using a likelihood function which applies a plurality of if-then rules to calculate an index corresponding to a degree of probability that the defect belongs to a particular class, a learning

type classifier which calculates a set of second likelihoods of the defect belonging to each of a plurality of defect classes by use of the characteristic of the defect, wherein the learning type classifier determines a distance to a center of a normal distribution of data for each defect class; and a calculator which calculates a set of third likelihoods of the defect belonging to each of said defect classes and/or rule classes, by use of the first and second likelihoods, and a classifier which classifies the defects by use of the calculated third likelihoods; and wherein the rule-based classification and learning type classification are present in a parallel relationship with each other and independent of each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
